

KNOW ALL MEN BY THESE PRESENTS

that

WONG MENG WENG

or Meng Weng Wong, if you're friends from Saints (92) or upenn.edu (SEAS '97)
or Burning Man ('03-'15) or Harvard Berkman ('16-'17)

having previously co-founded

POBOX.COM

exited to Fastmail.fm

KARMASPHERE.COM

exited to FICO

HACKERSPACE.SG

Singapore's first hackerspace

JFDI.ASIA

Singapore's first seed accelerator

and having previously co-authored

SPF
(RFC4408)

a globally deployed opensource email standard based on a domain-specific language

TOGETHER WITH

ALEXIS CHUN

a recovering lawyer
previously at TSMP (M&A) and at
Rajah & Tann (commercial litigation)

VIKRAM

VERMA

a self-taught mathematician
specialising in dependently typed
functional languages

VIRGIL

GRIFFITH

a Caltech PhD

previously founder of Wikiscanner
and Onion.link

SEBASTIAAN

DECKERS

a full-stack Javascript developer
previously teaching web development
at General Assembly

ONG CHIAH LI

a domain expert in
startup financings

previously a full-stack VC associate

JOB CHONG

a self-taught Javascript developer
fresh out of NUS law school
and thus a π -shaped person

AND

a host of other contributors

each equipped with unique superpowers

which humility, not to mention space constraints, forbid adumbrating at this time

IS NOW WORKING ON

LEGALESE.COM

originally an internal project at JFDI Asia

designed to scratch-our-own-itch

that has by our estimation saved JFDI's 69 startups

up to \$345,000 in legal fees

now being spun out as

A SHINY NEW STARTUP

which will apply

MARC ANDREESSEN's dictum

"SOFTWARE IS EATING THE WORLD"

to the **LEGAL INDUSTRY**

by exploiting the

UNCANNY PARALLELS

(this gets technical; bear with me)

between

THE DRAFTING OF

CONTRACTS

and

THE DEVELOPMENT OF

SOFTWARE

both of which deal in

variable definitions
event-driven callbacks
exception handling
version control

anonymous functions
if/then/else statements
dependency graphs
collaborative editing

and other notions which

COMPUTER SCIENTISTS

are intimately familiar with

but which

LAWYERS

have no names for

not because lawyers are necessarily **UNINTELLIGENT**, but simply because

law **PREDATES** computer science by **THOUSANDS** of years

and because, if you think about it,

most **SENIOR PARTNERS** alive today were in **LAW SCHOOL**

when **FAX MACHINES** were **NEW**

WITH THE SIMPLE GOAL

THAT

what

INTUIT

has done for

ACCOUNTING

what

ADOBE

has done for

ART & DESIGN

what

AUTODESK

has done for

ENGINEERING

LEGALESE

will do for

LAW

specifically,

THE \$80B CORPORATE CONTRACTS INDUSTRY

because

(if one may be permitted to speak frankly)

in a world where **CARS** drive **THEMSELVES**

it is **QUITE MAD** to pay a **HUMAN**

FIVE HUNDRED an **HOUR**

to **COPY** and **PASTE**

WORDS upon a **PAGE**

FIRST BY DEVELOPING A DSL

dubbed "**L4**"

a **DOMAIN-SPECIFIC-LANGUAGE**

for **LEGAL AGREEMENTS** and **REGULATIONS**

that does for the **MODAL μ -CALCULUS**

what functional languages do for the **LAMBDA CALCULUS**

THEN BY BUILDING COMPILERS

which will target **ENGLISH**

and other **NATURAL LANGUAGES**

(imagine multilingual contracts, each provably identical)

and will also target **ETHEREUM**

and other **BLOCKCHAIN PLATFORMS**

(because bugs in smart contracts cost real money)

accompanied by a powerful **STATIC ANALYZER**

capable of **FORMAL VERIFICATION**,

or at any rate **EXHAUSTIVE TEST SUITES**

that prove, to the extent that

such **PROOF** is **MATHEMATICALLY POSSIBLE**,

contracts written in the language are

CORRECT • CONSISTENT • COMPLETE

speaking of which

(if one may be frank again)

most programmers write **PROGRAMS**;

fewer (very advanced) coders write **COMPILERS**

which compile the programs to their final form;

but many lawyers **ACT AS** compilers -

it's as if they missed the memo

THUS ESTABLISHING A FOUNDATION

just as **SQL** is foundational to **DATABASES**

HTML is foundational to **THE WEB**

POSTSCRIPT is foundational to **DIGITAL PRINTING**

FOR A COMPLETE TECH STACK

translating ideas like

IDEs, **LINTING**, **BUILD TOOLS**,

UNIT TESTS and **FUZZ TESTING**,

OPENSOURCE LIBRARIES, **VERSION CONTROL**,

and the rest of the **PROGRAMMER'S ARSENAL**

of **TOOLS** and **TECHNIQUES**

THAT CULMINATES IN APPS

for end-users

not law firms!

the first of which (our **MVP**)

helps **STARTUPS** generate **ALL** the paperwork

needed to close their **ANGEL ROUNDS**

which is to say

not just the **TERM SHEET**

but all the **RESOLUTIONS** and **FILINGS** and

other **PREREQUISITES** which most founders don't know about)

WITHOUT

spending **TIME** or **MONEY** on

LAWYERS

which **APPLICATIONS** will

slowly but surely

nibble away at the

high-margin

low-volume

manually operated

jealously proprietary

LAW FIRM

replacing

it with a

high-volume

low-margin

automated

largely opensource

NEW INDUSTRY

which we call

COMPUTATIONAL
LEGAL

KNOW ALL MEN BY THESE PRESENTS

MENG IS DOING A NEW STARTUP

LEGALESE.COM

AND INVITING HIS FRIENDS
TO GET INVOLVED AS THEIR SKILLS PERMIT

SO DON'T SAY
BO JIO
